

The Family School Wellness Program is an important part of a healthy Chinook's Edge school community. Our focus is providing support to children and families facing social, emotional, or family difficulties as well as supporting students daily in schools. We can all use help from time to time, and if you feel there is an opportunity to be curious and explore new ways to grow and be supported please contact our Family School Wellness Program (FSW) worker in your child's school. Our program requires parental / guardian consent, and we encourage parent/family involvement in order to ensure consistency of support.
